## EDUCATION

### University of Pennsylvania

Philadelphia, PA

*Bachelor of Science in Engineering in Computer Science, Minor in Mathematics*

*Aug. 2023 – May 2027*

*Master of Science in Engineering in Computer and Information Science*

*Jan. 2026 – Dec. 2027*

## EXPERIENCE

### Software Development Engineer Intern

May 2026 – Aug. 2026

*Amazon*

*Seattle, WA*

- Built the **Entry ID plugin** for Amazon Customer Service's centralized configuration platform, replacing unvalidated legacy write paths for **5,200+ routing configurations** read at runtime by Amazon Connect
- Developed and launched full-stack CRUD and audit tooling using **React, API Gateway, Lambda, DynamoDB, and Smithy**, enabling self-service access for **70+ operations users**
- Designed a bulk CSV upload system by evaluating **5 architectures** and implementing merge-based writes that prevent silent attribute deletion

### Software Development Engineer Intern

May 2025 – Aug. 2025

*Amazon*

*Seattle, WA*

- Served as the first developer on the **Network Health Service**, building AWS infrastructure and the **Missed Call Module** to identify customer calls affected by poor agent network quality
- Created an end-to-end pipeline in **AWS CDK** using **TypeScript, Lambda, API Gateway, and SNS**, including a reusable internal package for metric calculation and data processing
- Integrated the service with Amazon Customer Service systems, enabling real-time visibility into agent connectivity issues

### Software Development Engineer Intern

May 2024 – Aug. 2024

*Amazon*

*Seattle, WA*

- Built an **LLM-powered widget title generator** using **SageMaker, Amazon Bedrock, and prompt engineering**, generating optimized titles for **10,000+ customer queries** on the Amazon.com Gateway
- Developed **Spark SQL** data pipelines and contributed to widget architecture spanning backend processing and frontend integration
- Won **3rd place** in an internal operational excellence hackathon by building "IMReady," an LLM-based tool that recommended cost-effective EC2 configurations from service metrics

### Research Assistant

May 2022 – June 2023

*Voice of Calling NPO*

*Northridge, CA*

- Developed **AtaxiaV**, a 3D rehabilitation and evaluation platform using **Unity** and the **Leap Motion Controller API** to recreate physical therapy exercises for patients with ataxia
- Designed augmented reality interactions for rehabilitation activities and presented the project at the **International Congress for Ataxia Research**
- Won **1st place** in the CA-33 Congressional App Challenge

## AWARDS & CERTIFICATIONS

**Amazon Future Engineer Scholarship:** \$40,000 scholarship, awarded April 2023

**AWS Certified Cloud Practitioner:** Earned January 2022

## TECHNICAL SKILLS

**Languages:** Java, Python, C, SQL, JavaScript, TypeScript, HTML/CSS

**Frameworks & Libraries:** React, Node.js, AWS CDK, JUnit, pandas, NumPy, TensorFlow

**Cloud & Developer Tools:** AWS Lambda, API Gateway, DynamoDB, SNS, SageMaker, Amazon Bedrock, Git, Docker, Spark SQL

**Technologies:** REST APIs, distributed systems, prompt engineering, Unity
